As a travelling sales rep who spend hours in my vehicle I have found that the 24 hr weather and traffic from XM has been an excellent source of up to the minute and highly detailed information. The information provided by XM is so highly detailed that it is of real value to me. The information provide sporadically by FM staions is minimal at best and lacks the detailed information needed to plan travel. XM's dedicated stations provide an easily accessible source for information I need and use throughout the day.

I repectfully urge your organization to reject NAB's Petition 04-160
